LMU Alumni

Objectives:

This corporately organized Research Seminar wants to enable scientists on all levels (professor, PostDocs, postgraduate) to regularly exchange themselves with renowned visiting scientists about current research questions in Management and applied microeconomics. Within this Seminar series we welcomed in the summer term 2008 nine visiting scientists from the University of Milan, HEC School of Management Paris, University of Tokyo, University of Texas at Austin, University of Maryland, University of Frankfurt, New York University, Wharton School and from the University of Southern Denmark.

Through generous encouragement from the LMU Management Alumni Network, this seminar can be continued and even extended with well known visiting lecturers.

In the winter term 2008/09 we are also expecting a series of top-class referees and are looking forward to an inspiring discussion.

Interested persons are always welcome to this fare-free event!
